## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-31 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Each of LaMedica, Jr. et al. (Pat. No.: US 6,381,742), Levine (Pat. No.: US 6,914,964) and Mauro, II (Pat. No.: US 7,133,696) teaches its own communication technique for use in a mobile switching center (MSC) to support and to transmit generic data messages in a Teletype TTY/TDD standard format to an TTY/TDD destination terminal while a calling cellular telephone modem device is in a voice service option operational mode. However, none of them, in combination or alone, teaches a logical flow steps of a method for monitoring a call, originating from a cellular telephone modem (CTM) device and terminating in a destination network in a system including a converter operative to convert call content from a CTM format to a Teletype for Telephone Devices for the Deaf (TTD/TDD) format and a Call Content Delivery Unit (CCDU), as recited in the independent method claims 1 and 7. Furthermore, the same considerations as made for claims 1 and 7 above are also valid for independent claims 13 and 18, since these claims include the similar feature combination as claims 1 and 7 in terms of the corresponding an *apparatus* claims. Finally, the prior art of record also fails to teach or fairly suggest a structure of elements of a mobile switching center (MSC) operative to allow monitoring of a call between a cellular telephone modem (CTM) device and another network, as recited in the independent claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
